

ISL Port Database

The most comprehensive database in port traffic

The **ISL Port Database** contains structured, comparable data since 1980 for more than 400 leading world ports.

This unique database is made possible by our network partners throughout the world providing the broad information for our annual ISL Port Database Survey.

Analytical scope - your tool for...

...benchmarking

- Cargo structures
- General market trends
- Performance of comparable ports

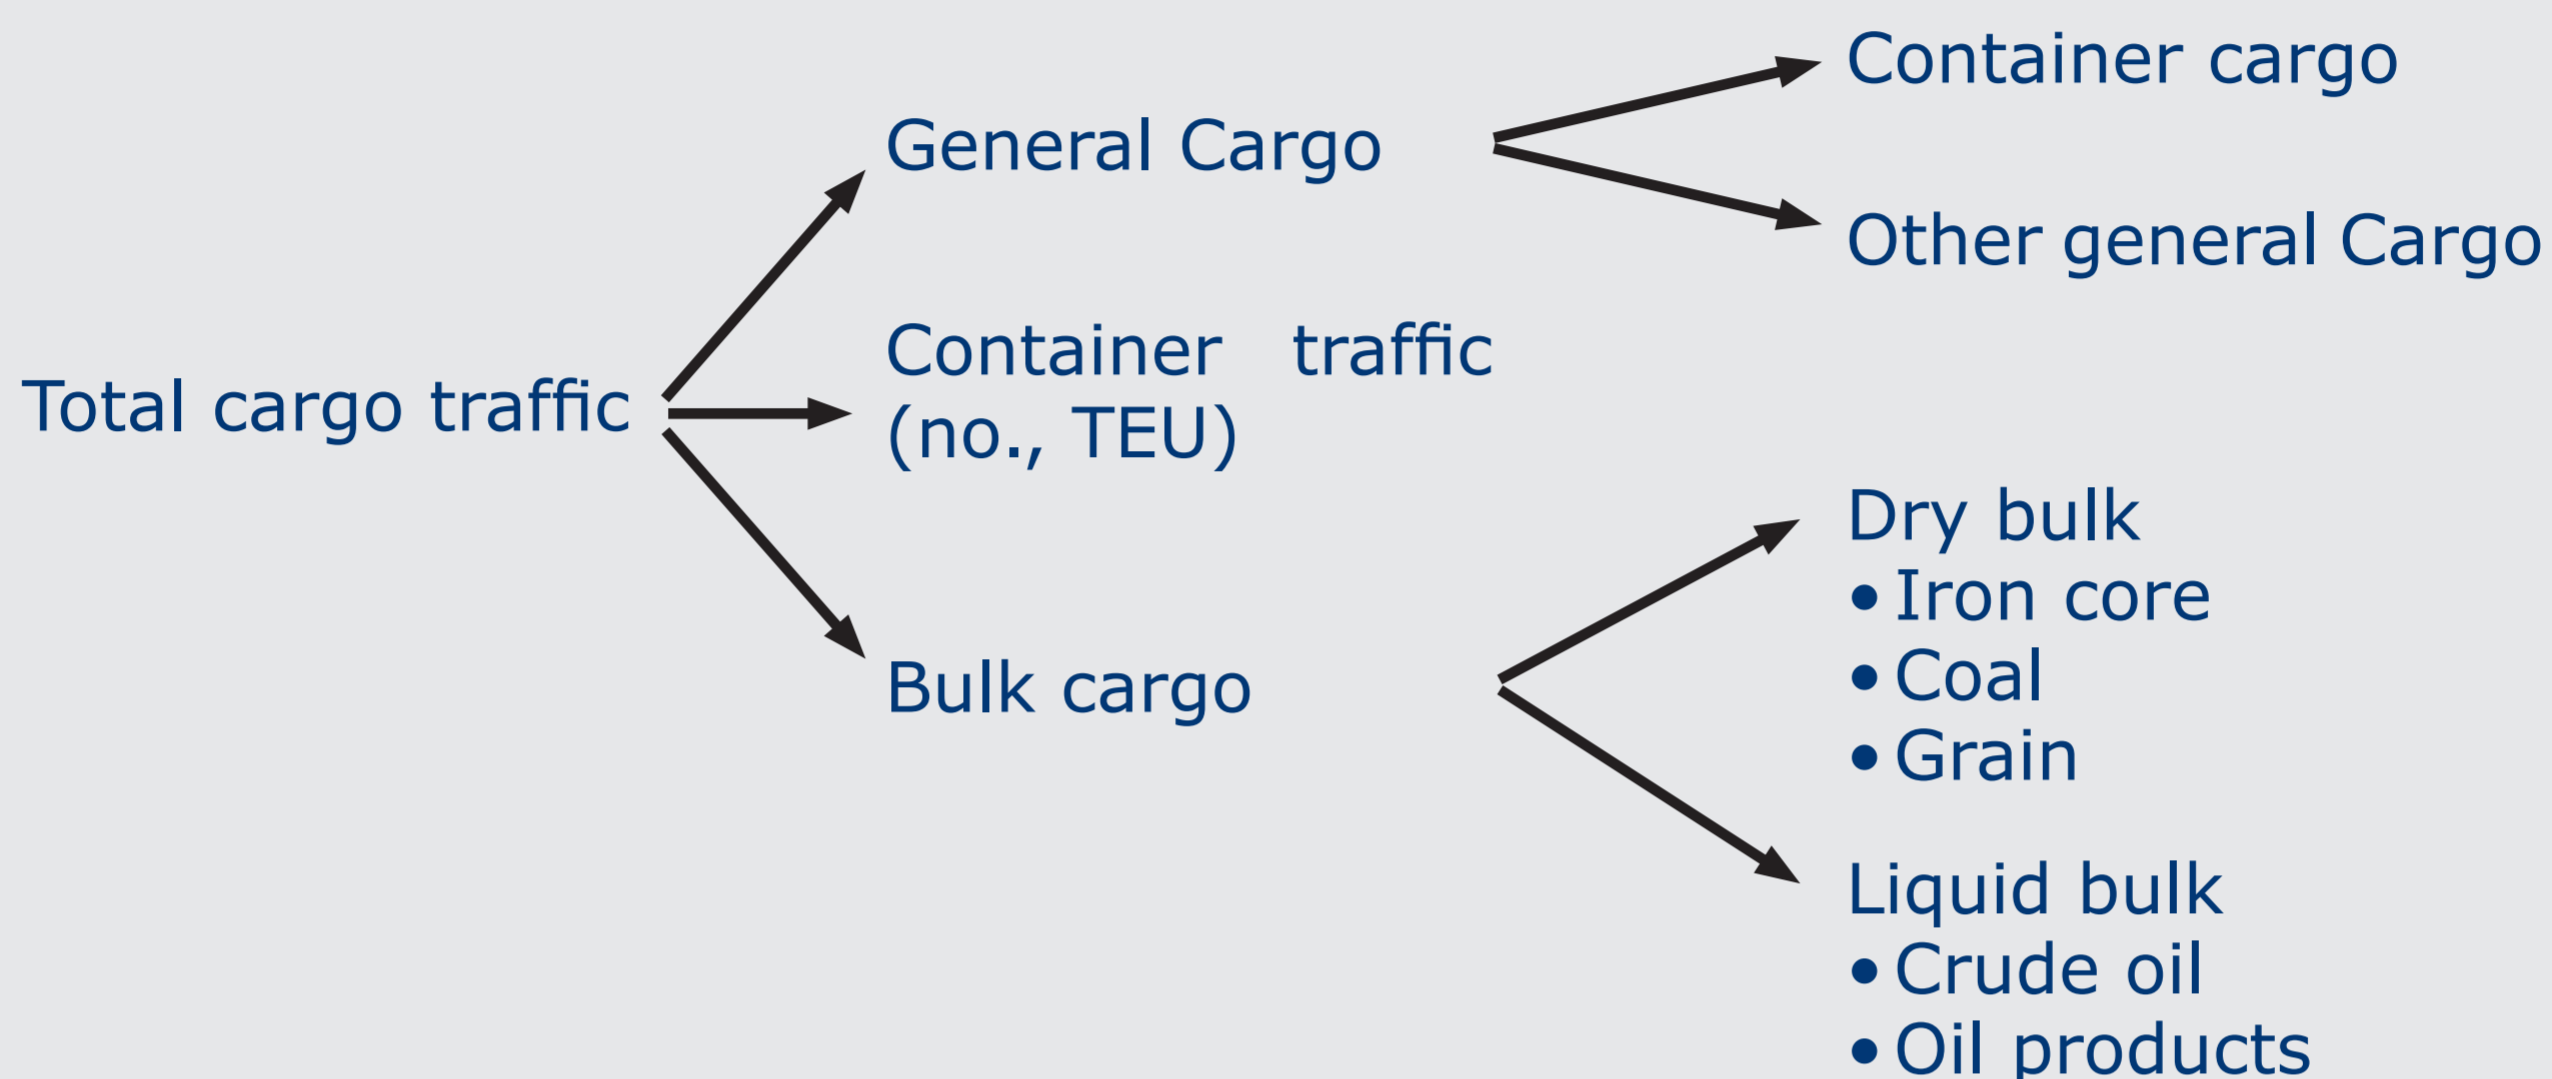

...regional analyses

- Major ports
- Commodity structures
- Predominant trading areas

...market research

- Loading categories
- Major bulk commodities
- Most important trading areas

Data structure - cargo traffic

Basis of calculation

Our basis for customised extracts from the Port Data Base is as follows:
 € 80.00 basic fee*, plus € 0.50 per item.

* The basic fee includes the setting up of a suited layout, the addition of the necessary explanatory remarks and footnotes as well as the transmission of the data by email or by fax. By subscribing to a specified analysis on an annual basis, you will save the basic fee and get an additional 20 per cent off the other costs starting the second year. Apart from customised database extracts, we provide standardised port profiles and rankings. Please contact us for contractual information.
